Mohamed Safwat

About me

Highly skilled and innovative Web developer with [4] years of experience designing and implementing responsive and visually appealing websites. Excellent problem-solving abilities and a strong attention to detail, combined with effective communication skills to collaborate with cross-functional teams.

Work Experience

○ 2019 - 2020

Next Technology Leaders (NTL)

Front-End Web Developer

- Wrote supporting code for web applications and websites. Created web application front-end as per design and information architecture. Developed and implemented procedures for ongoing Web site revision. Wrote code using specific programming languages and tools.

○ 2020 - 2021

Information Technology Institute

UI / UX Designer

- Followed best practices and standards for accessibility and cross browser compatibility. Engaged in requirement specification processes for new software functionality. Facilitated rich web user interfaces using HTML elements. Collected feedback from design and technical staff on website development needs. Performed and directed Web site updates.

○ 2021 - 2022

Future Work is Digital (FWD)

Back-End Web Developer

- Installed and configured hypertext transfer protocol (HTTP) servers and associated operating systems. Communicated with network personnel and Web site hosted agencies to address hardware and software issues affecting Web sites. Collaborated with management and users to develop e-commerce strategies and to integrate these strategies with Web sites. Developed databases that supported Web applications and Web sites.
